Can PREMA's Cycle of Change unlock unexpected GHG reduction opportunities beyond conventional energy-saving measures? YES… with **Net Zero Agent**!!!

By Widhoon Chiamchittrong, Thaipremanet, Widhoon@gmail.com

Drawing on two Net Zero Agent workshops in Thailand, Thai PREMAnet will share how organizations can discover hidden emission sources, develop innovative solutions and build viable business cases using simple, practical tools — even without prior carbon accounting expertise. Join us to explore how PREMA can unlock new opportunities across the value chain, particularly in Scope 3.

Key Takeaways

PREMA Goes Carbon and Net Zero
Unlock Hidden Opportunities

01 Same Cycle of Change, New Perspective

Extend resource-efficiency thinking to GHG hotspots across Scope 1, 2 and 3.

02 Discover Hidden Opportunities

Look beyond energy efficiency and unlock innovation through root cause analysis.

03 Make GHG Reduction Investable

Transform emission challenges into practical measures and viable business cases.

04 No CFO or CFP? Start Anyway.

Empower internal Net Zero Agents with simple tools, without requiring prior carbon accounting expertise.

05 Scope 3: The Next Frontier

Unlock potentially greater opportunities through value-chain collaboration.

Electricity losses: look beyond the meter

PEA team explored network losses and upstream electricity.

The team identified losses, investigated causes and proposed network and equipment improvements.

It labelled its selected issue Scope 3.

Confirm the reporting boundary and category before using the figures.
